

How to Enable GPS Location on the ServiceDeck for Workers App (iOS)

**Step 1:
Open Settings
on your IOS device.**

**Step 2:
Scroll down and
tap Apps.**

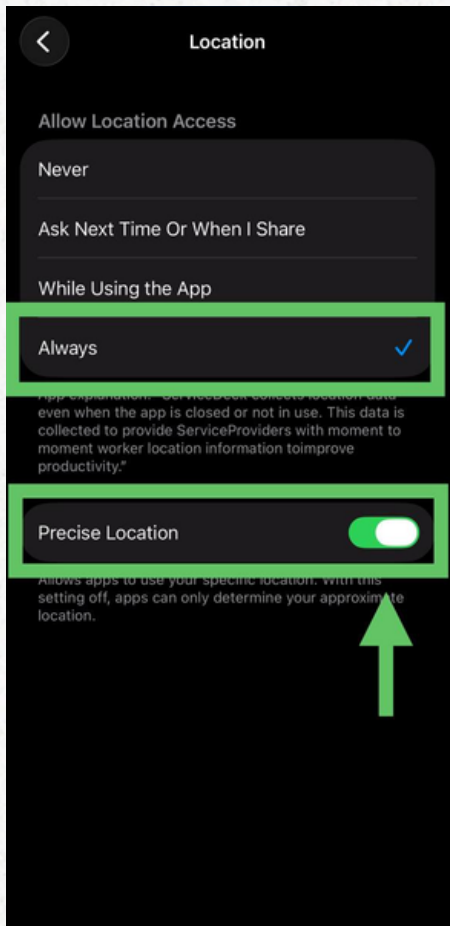

**Step 3:
Search for a
ServiceDeck App
for Workers.**

Step 4:
Tap “Location”.
Make sure
it is set to “Always”.

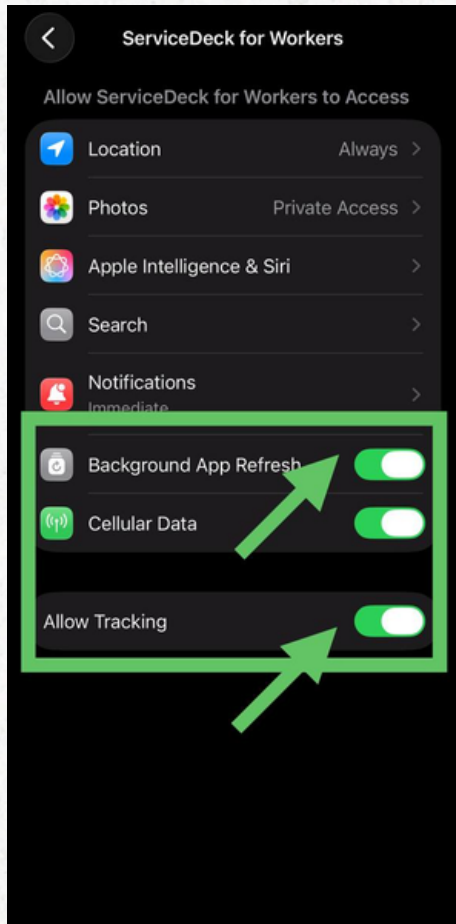

If available on your
iPhone, turn on
Precise Location.

Step 5: Go back to the App Settings.

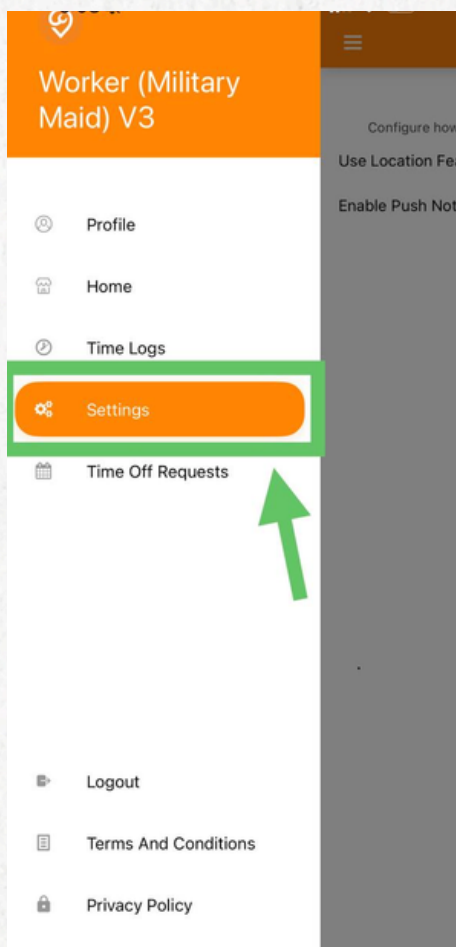

Make sure the
following toggles
are ON:

- Background App Refresh
- Cellular Data
- Allow Tracking

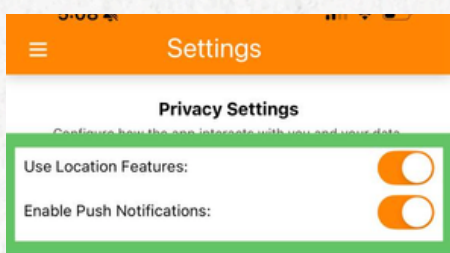

Step 6:
Open the
ServiceDeck for
Workers App on
your device.

Go to Settings.

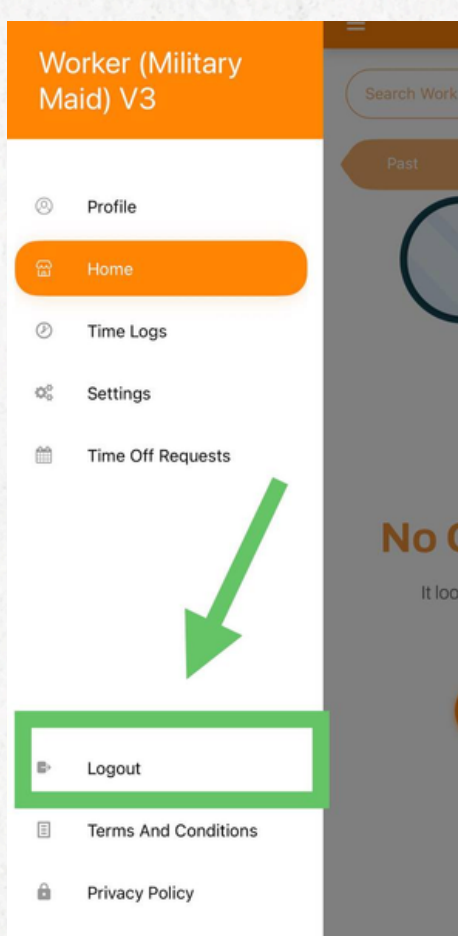

Step 7:
Make sure the
following toggles
are ON:

- **Use Location Features**
- **Push Notifications**

Step 8:
Log out of the application, then log back in using the same email and password.

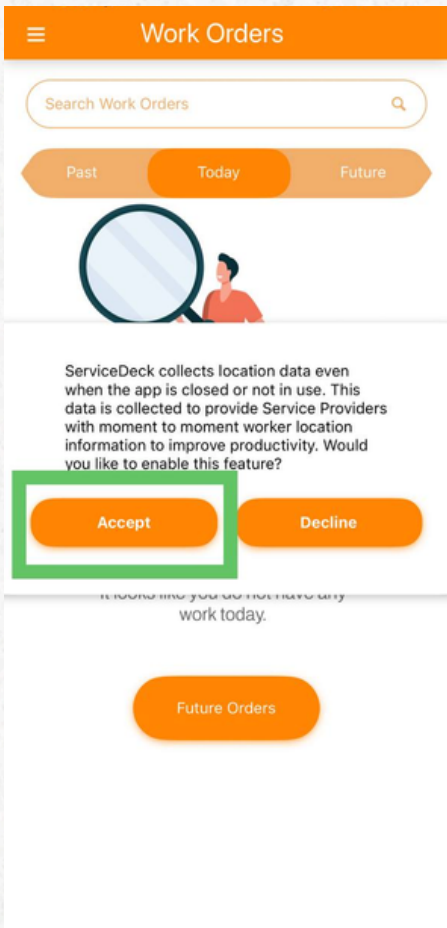

This ensures all newly enabled settings are applied

**Step 9:
Log in again.**

**After logging back
in, a pop-up will
appear.**

Tap Accept.

Step 9:
You will then see
a confirmation
message saying:
*Tracking services
have been
enabled.*

Tap OK to finish.
